_____

Profile Summary

Results & Goals-oriented professional with 6 plus years of experience as a Front End developer. Have good strengths in execution through all phases of the project and SDLC processes. Primarily worked as a front end developer in close coordination with the UX designers. I am passionate to learn and work on new and across stack technologies with a knack for a practical and hands-on approach. Effective communicator at all levels of the organization, expertise in scalable product development approach, in combination with excellent domain knowledge & technical skills. Proven areas of expertise and know-how experiences are:

· Global IT Delivery & Support	· Project Methodologies – Agile and Waterfall	· Team Management/Co-ordination
· Architecture Designing	· Process Improvements & Adoption of Best Practices	· Test-Driven Development

Applications
- IDE: Webstorm, Intellij, Xcode, Eclipse, Netbeans
- Other(s): SQL Developer, Sublime, Atom, Marvel, Zeplin, Sketch

Domains
- **Project Management:** P6, Primavera and Latista(Prime Fields) and Aconex
- **HealthCare**: Diabetes and Cardiology specialities

Technical Skills
- Web Development hands-on experience in Object-Oriented Javascript, HTML5, Jquery, NodeJS, KarmaJS, AngularJS and Angular.
- Worked on Require.js, Underscore, lodash
- Mobile application development experience in Swift 3, Swift 4 and Ionic
- Experienced in working with Realm DB, SQL Server, MySQL and Oracle DB
- Experience in working on Websockets and REST APIs.
- Knowledge of SQL queries
- Performance Tuning – Optimization and refactoring using suitable design patterns
- Experienced in Bug-tracking & Documentation Management tools (JIRA & Confluence)

Leadership & Interpersonal Skills

- Skilled in facilitating scrum with team members, providing status reports, consolidating module-level progress updates, milestones, opportunities and identifying risks and challenges.
- Involvement in prioritizing requirements with key stakeholders (Weekly/Monthly/Quarterly reviews)
- Self-motivated & enthusiastic team player with good interpersonal skills, ability to perform under high-stress situations and accomplish optimal performance in team members.
- Lead a team of 5 people and successfully delivered multiple releases on time with high code quality.
- Involved in five end to end product developments.
- Accustomed to working in product deployment and release, production support activities using various project methodologies.

Professional Experience

Oracle India Pvt. Ltd   **Nov 2018 - Present**

- **Aconex**
  Role – Senior Application Developer, Individual Contributor - 3

  o Joined as a UI developer for the app which is designed for Aconex - Construction and Engineering project management product.
  o Upgraded an application module from Angular 1.5 to Angular 8.
  o Strictly followed TDD (Test Driven Development) model for each feature development.

_____

- o   Experimenting with the Ojet framework for the application and creating Proof of Concepts.
- o   Redesigned a module using Angular pipes and Services.
- o   Closely worked the design team to help create a Uniform Design System for the application which involved the creation of standard drop downs and filter/search components.
- o   Created the documentation for external APIs and usage.
- o   Upgraded the app node dependencies as per the Oracle recommendations.

Cura Technologies   **Dec 2017 - Nov 2018**

- **Cardiology Speciality Application Development**
  Role – Senior Application Developer

  - o   Following Agile Process – Scrum methodology for product development
  - o   Lead developer for the app which is designed for cardiologists.
  - o   Worked on iOS Development using Swift version 3 and 4
  - o   Design the implementation for the new features along with the architects and the stakeholders
  - o   Closely worked with the designers to generate the prototypes for the customer demos.
  - o   Worked on creating/standardising the design implementation through the mobile app.
  - o   Developed multiple prototypes for the team to help finalize the suitable design for the app.
  - o   Thorough analysis of the impact areas for the new changes with the design team
  - o   Reviewed code/defects/bug fixes with the development and the design team
  - o   Perform technical activities during project code freeze, Data migration and product release
  - o   Used Jira tool to log ticket details, update status and progress on a day-to-day basis
  - o   Performed the role of a Scrum Master.
  - o   Performed the code migration from swift 3 to 4 for the whole application
  - o   Managed the post-release activities like development support for the SLAs and the deployment team
  - o   Attending Business process meetings with process teams for complex Interfaces, enhancement discussion and preparation of end-to-end design/development and deliverable activities

- **Diabetes Speciality Application**
  Role: Senior Application Developer

  - o   Developer for the app, designed for the diabetologists
  - o   Worked on iOS Development using Swift version 3 and 4
  - o   Implementation for the new features along with the architects and designers.
  - o   Created reactive app with the implementation of the design patterns.
  - o   Thorough analysis of the impact areas for the new changes with the design team and worked closely with them to understand the product changes and prioritize them based on the effort and delivery timelines.
  - o   Reviewed code/defects/bug fixes with the development and the design team
  - o   Perform technical activities during project code freeze, Data migration and product release
  - o   Prepared Technical objects deliverables for Scrum, Sprints and tracking on a daily basis
  - o   Used Jira tool to log ticket details, update status and progress on a day-to-day basis
  - o   Performed the code migration from swift 3 to 4 for the whole application

Oracle India Pvt Ltd.   **June 2013 - August 2017**

- **Primavera Resource/Schedule Management**
  Role: Applications Developer, IC-2

  - o   Developed the UI for Project Resource and Roles creation pages with Object-Oriented Javascript concepts. It involved the refactoring of the code to use prototypal Inheritance
  - o   Developed the UI for Resource Analysis and Resource Management modules for better management and tracking of the resource/roles utilization in a project management lifecycle.

_____

- o Led the development of the integration of resource management into the schedule management module to better synchronise project management.
- o Developed unit tests cases for the respective modules.
- o Worked independently on the timestamp grid to display the sporadic data for the resources allocation through the lifecycle of the project.
- o Optimised the framework components to reduce the rendering and loading time of the charts and the time spread data of multiple years. This was particularly achieved using Web sockets.
- o Worked on Ocharts and d3.js to draw the charts for the graphical representation of the resource availability and allocation for multiple projects.
- o Coordinated with the component and strategy teams to understand and develop the new components for the modules.
- o Presented various demos on the release deliverables and bug fixes to the management and the strategy team.
- o Refactored the legacy code for better performance and maintenance, mainly for the Resource Management Modules.
- o Used Jira and Confluence to track and document the product tasks and enhancements.
- o Provided support for the post-release activities along with production issue support and UAT (User Acceptance Testing)
- o Reviewed code/defects/bug fixes with the Development and the strategy teams
- o Worked on triaging the features and requirement changes for each release along with the stakeholders

- **Sustaining Engineering – Retail Merchandising System**
  Role: Intern

  - o Worked on the support and sustenance team to fix customer bugs on the Retail product - RMS
  - o Worked on Oracle Forms 11 using SQL and PL SQL
  - o Triaged the bugs and reviewed the fixes for the sprints
  - o Understood the complete application, to manage the fundamental elements of their business such as organization and product hierarchies, locations and suppliers.
  - o Coordinated with the customer support team to deliver the patches for individual customers on time and with the post-patch support
  - o Regularly apprised the onsite team with the ongoing change requests and sprint plans.
  - o Updated daily status on development progress to manager & weekly status updates
  - o Documented developments including technical specification & unit test results, as per Standards

Cognizant Technology Solutions   **Mar 2011 - July 2012**

- **DNB Linkage – Publisher**
  Role: Application Programmer

  - o Developed the linkage application for Dun and Bradstreet
  - o Written JUnit test classes for the code developed to ensure the better maintenance
  - o Documented developments including technical specification & unit test results, as per Standards
  - o Developed code to verify the XML inputs received from the message queues using the XML parsers

Education Details

- Masters in Computer Science & Engineering from Manipal Institute of Technology, Manipal University – 2012-2014 (Awarded scholarship from Ministry Of Human Resource and Development, Govt. of India)
- Bachelors in Computer Science & Engineering from Saurashtra University – 2006-2010
